Three4Climate supports the rotating presidencies of the Council of the European Union (EU). Germany took over the presidency in the second half of 2020 and together with the two following presidencies by Portugal (first half of 2021) and Slovenia (current), the German government supports the trilateral climate protection activities in cooperation with the EU as well as national and local actors. The focus is on ambitious climate measures in cities and schools as well as the connection of involved actors; both between countries and from the local to the EU level.
